

Panel Weld & Bead Detail

Track Detail

Raised Handle

PremierVue Product Features:

- **Interchangeable and reversible panel interlocks** allow for easy reconfiguration on the job site without the risky reglazing process, in most circumstances, and with minimal parts.
- **Ability to field change** from standard stack to reverse stack, with no costly reglazing required.
- **Panels can be installed or removed from the interior or exterior**, making condo applications a breeze.
- **Separate one piece sill riser** suitable for retrofit or new construction.
- **Replaceable sill tracks** can be easily replaced by individual drop-in parts, should jobsite damage occurs.
- **Recessed pull with dual-point mortise lock** provides extraordinary security over other market recessed pulls.
- **No visible installation or assembly screws** provide a finished look.
- **Two tone color option** provides ability to offer white on the interior and bronze on the exterior (standard product color is white interior / white exterior).
- **High quality hardware** consists of a dual-point, mortise locking mechanism and choice of raised style pull handles or recessed pulls.
- **Roller assembly options** are 2-1/8" wheels as either tandem stainless steel wheels or tandem Delrin® wheels with stainless steel housing.
- **Dual durometer glazing pocket** provides a clean site line.
- **Design pressures** of +/-60 and up to +/-100.

Style Meets High Performance in an Exclusive Window and Door Product Line

Sliding Glass Door

SGD2770 and SGD2870

PremierVue™, PGT's premium product line, combines style and high performance to meet the needs of today's discerning homeowner. PremierVue has some of the highest ratings for energy, structural, air and water resistance in a vinyl impact product line for the single and multi-family residential markets.

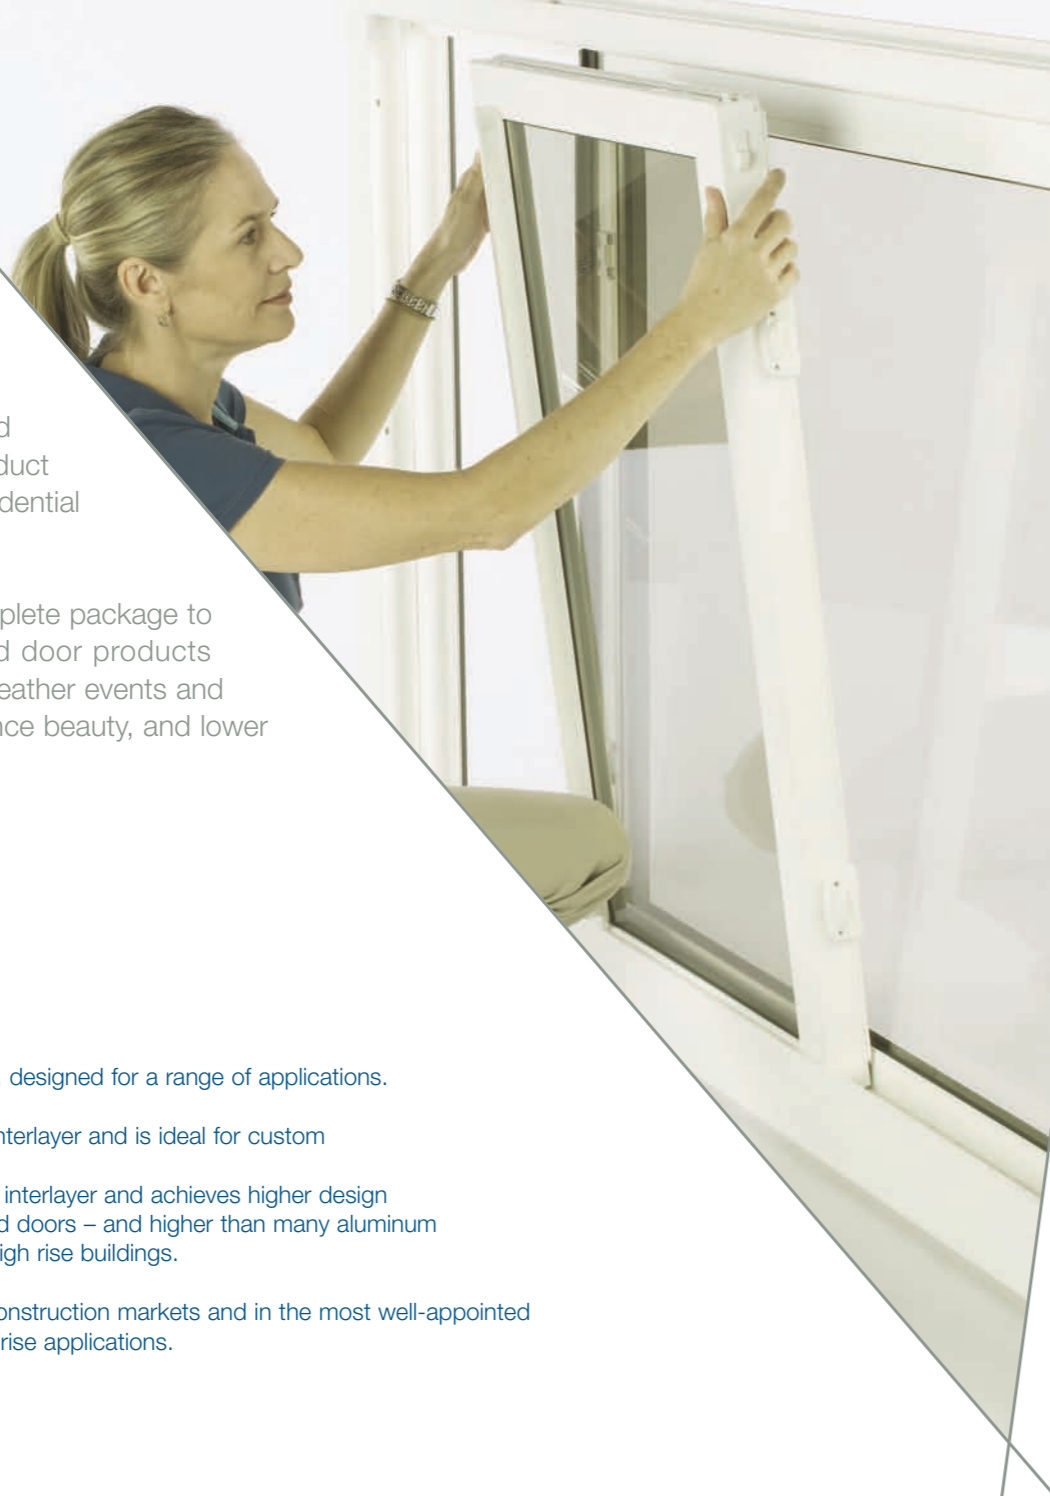

With PremierVue, PGT offers the complete package to our customers – quality window and door products that protect homes against severe weather events and intruders, reduce energy costs, enhance beauty, and lower outdoor noise.

2700 and 2800 Series

The PremierVue line offers two different series, designed for a range of applications.

- The 2700 Series incorporates a PVB interlayer and is ideal for custom homes and low-to-mid rise buildings.
- The 2800 Series incorporates an SGP interlayer and achieves higher design pressures than most vinyl windows and doors – and higher than many aluminum products – making it ideal for mid-to-high rise buildings.

Both are found in the replacement and new construction markets and in the most well-appointed homes, condominiums, hotels and other high rise applications.

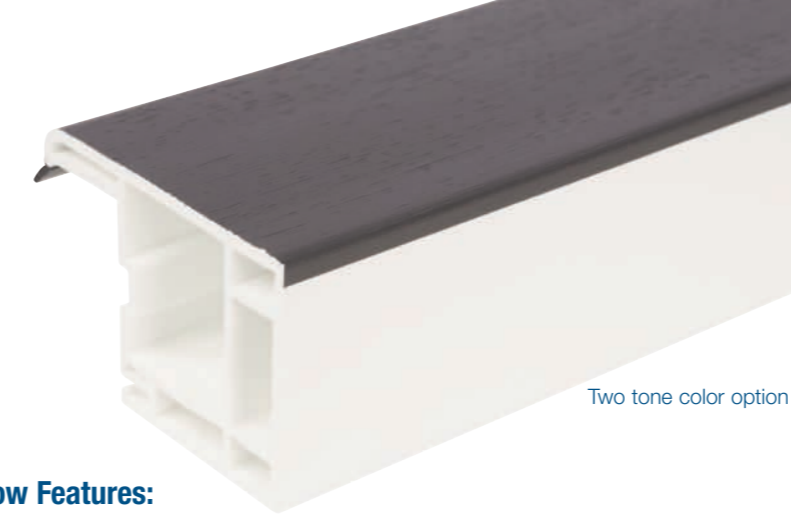

Tilt latches and locks

Clean, detailed welded corners

High quality hardware

Two tone color option

PremierVue Window Features:

- **Multi-chambered fusion welded main frame and sash corners** offer unmatched strength, durability and energy performance. PVC vinyl compounds have superior impact resistance and will withstand the harmful effects of the sun and salt laden air.
- **Two Tone color option** provides ability to offer white on the interior and bronze on the exterior (standard product color is white interior / white exterior).
- **Corrosion resistant balance system** offers smooth reliable finger tip operation of sashes.
- **16 gauge galvanized steel reinforcement** in all sash rails eliminates the possibility of sash deflection, keeping locks, keepers and weather stripping in perfect alignment.
- **Fasteners** are made of premium stainless steel to withstand harsh saltwater environment.
- **Proprietary tilt latches and pivot bars** offer superior structural support and easy cleaning.
- **Self locking, double action sash locks** for peace of mind and increased security.
- **High quality hardware** is all multi-locking and stainless steel, coastal-grade.
- **Triple weather seals** reduce air and water infiltration while resisting mold and mildew growth.
- **Super Spacer® NXT** delivers superior energy performance and virtually eliminates condensation.
- **Washable hinge** casement allows for easy window cleaning from inside the home.
- **Tilt sash function** on the HR2710/2810 and DH2760/2860 allows for easy removal of sashes and cleaning from inside the home. The DH2760/DH2860 offers both bottom and top tilt sashes.
- **Monorail and Interlock system option** on the HR2710/2810 provides for smooth operation while increasing design pressures.

PremierVue Product Benefits:

Hurricane Protection

PremierVue is the first line of defense to protect a home or building from flying debris and destructive hurricane force winds. The Series has been designed, engineered, tested and certified with the most stringent building codes in mind and has structural ratings not seen in other vinyl impact window systems.

Energy Efficiency

Through the use of best-in-class glass technologies and multi-chambered, reinforced frames, PremierVue is able to achieve high energy performance numbers, as rated by the NFRC.

Safety and Security

PremierVue contains features and materials such as heavy duty laminated safety glass and proprietary locking, tilting and pivoting mechanisms that offer more protection than standard windows.

Noise Reduction

PremierVue virtually eliminates unwanted sounds from outside through use of a multi-chambered vinyl frame that stops noise from passing through the window, eliminating outside noise by up to 50%.

Reduced Insurance Rates

PremierVue provides a homeowner constant protection that will greatly reduce property damage and insurance premiums, resulting in decreased policy cancellations.

Ultraviolet Ray Protection

PremierVue contains high performance, laminated impact glass that works to eliminate 99% of the sun's damaging Ultraviolet Rays. Our glass helps to prolong the life of a home's furnishings, carpet and artwork, while bringing light into the home and making it a safe, comfortable environment.
